

Rahul Das | Data Scientist | GEN AI, ML| 13+ yrs SW, 9+ yrs
Gen AI & ML

With over 13 years in the software industry and 9+ years dedicated to Data Science, GenAI, and Machine Learning, I am at the forefront of Generative AI innovation. I specialize in turning complex data challenges into actionable, scalable solutions for the financial sector. My recent work focuses on pioneering LLM-based solutions, including development of an advanced Low-code Platform (MCP) to accelerate React and React Native app development, building a sophisticated Agentic communication system using an actor-reviewer pattern to enhance codebase intelligence, and creating a financial chatbot with automated workflows like invoice parsing. Beyond GenAI, my expertise includes Explainable AI/ML models for transparency in decision-making, Synthetic Tabular Data Generator ensuring privacy and security, and exploration of emerging technologies like Rust and Mojo for scientific computing. I'm currently seeking to contribute to cutting-edge ML and DL projects, advancing AI models, and implementing large-scale ML solutions.

Relevant Experience

Current - Oct 2024	Data Scientist EdgeVerve
» Gen AI Development	Client - Finacle
Architected a low-code, GenAI-driven platform automating 80% of app development from Figma designs via multi-agent coordination and stateful workflows, significantly reducing manual effort and accelerating delivery times.	
Roles & Responsibilities -	
- Pioneered an LLM-powered developer-agent interaction framework using LiteLLM for stateful orchestration, enabling efficient code extraction, review, and refactoring with automated knowledge transfer across development cycles - Designed and deployed a stateful financial support chatbot using Pydantic AI, integrated with multi-agent pipelines for query understanding, compliance verification, and Financial Transaction posting enhancing customer experience - Developed advanced Low-code Platform using MCP/AG-UI protocol to accelerate React and React Native app development with multi-agent coordination	
Tool	LiteLLM, Pydantic AI, MCP Protocol, AG-UI Protocol, Multi-agent Systems,
Mar 2023 - Oct 2024	Consultant - Data Science EdgeVerve
» AutoML Platform & Synthetic Data Generator	Client - Finacle
Developed a statistical equivalent Synthetic Tabular Data Generator without GANs/Autoencoders, enabling secure financial data sharing. Built a fully functional AutoML platform supporting regression, classification, and time series forecasting with explainability.	
Roles & Responsibilities -	
- Created Synthetic Tabular Data Generator tailored for banking domain ensuring privacy and security - Integrated multiple time series forecasting packages into AutoML platform - Implemented explainable AI models to enhance transparency in complex decision-making	
Tool	scikit-learn, dask-ml, Optuna, SHAP, LIME, sktime, statsmodels, ML-Forecast,

Relevant Skills

Python 9+ Years
core-library, type-hinting, FastAPI, Flask, Quart, asyncio, Pydantic, aiohttp,

GenAI & LLM 2+ Years
LiteLLM, MCP Protocol, AG-UI Protocol, FastMCP, Pydantic-ai, langchain, LangGraph, Pydantic-graph,

Data Science 7+ Years
numpy, scikit-learn, Optuna, matplotlib, seaborn, opencv, SHAP, LIME, dask-ml,

ML/DL Framework 5+ Years
tensorflow, Keras, pytorch, YOLO, AutoML,

SQL Database 6+ Years
postgres, Azure Databricks, Python/sqlite3, pyspark, pandas,

DS Fundamentals 6+ Years
Statistics, Linear Algebra, Time Series, Explainable AI,

Academics

May 2010- | M.Tech | CGPA 9.1
May 2012
Telecommunications Engineering
Mar 2005- | B.Tech | CGPA 8.5
Mar 2009
Electronics & Communications Engineering

Jun 2021 - Oct 2024

Assistant Consultant | TCS

» **Retail ML Solutions - Item/Buddy Matching & Product Detection** Client - **Walgreens**

Developed ML models for retail demand/supply, recommendations, pricing, and customer experience. Built item clustering systems using textual and image information for merchandise organization and product identification using YOLO object detection.

Roles & Responsibilities -

- Implemented clustering algorithms using textual information for product similarity matching
- Developed object detection models using YOLOV3 for empty shelf detection and product recognition
- Created associative rule mining systems to find item associations for planogram optimization
- Built scalable ML systems for production deployment and monitoring

Tool python3, Tensorflow, keras, YOLO, opencv, scikit-learn,
- numpy, matplotlib,

Aug 2012 - Aug 2017

System Engineer | TCS

» **Core Banking Solution [CBS]** Client - **State Bank of India**

Execution of core banking system across all branches and speed up all financial transactions, automation of EOD interests calculation and offline reporting.

Roles & Responsibilities -

- Enhancements for interest calculation for loan products.
- Change request implementation for parameter change, customer level limit tree creation, NPA, Financial transaction.
- Offline and ad-hoc report generation.

Tool - SQL, COBOL, Unix,

Certification

Post Graduate Program in GEN-AI and ML

- SimpliLearn PGC AIML - Capstone
- Essentials of Generative AI, Prompt Engineering & ChatGPT
- Deep Learning Specialization
- AI and Machine Learning Academic Masterclass

Google Cloud

- Google Cloud Fundamentals
- Google Cloud Infrastructure
- Google Core Services
- Scaling and Automation
- Google Kubernetes Engine

Deep Learning Specilization

- Neural Networks and Deep Learning
- Structuring ML Projects
- Improving Deep Neural Networks
- Convolutional Neural Networks
- Sequence Models

3D Reconstruction from Image

Modern Javascript Bootcamp

Achievement

- Feb 2025 - Finacle Acer Award FY 25 in the Innovation category for my significant contributions to Synthetic Data Generation!
- Oct 2016 - Technical Excellence Award for successful automation of Agricultural Subvention Reporting
